

Microsoft ENTERPRISE AGREEMENT

FACTS

TSS Division of Information Systems has entered into a statewide enterprise agreement with Microsoft, consolidating all licenses procured by the state into a single agreement.

This is expected to leverage the state's tremendous buying power and save an estimated \$1.4 million per year

Business Benefits

The enterprise agreement with Microsoft will offer the best value to public entities.

Best pricing and discounts

Reduce the cost of IT computing

Maximize software expenditures

Single payment vs multiple transactions

Streamlines license management

Single platform for agency collaboration

Operational Benefits

The enterprise agreement with Microsoft will enable you to better focus on the delivery of public services to citizens.

B24/7 technical support & training

Eliminates staff performing upgrades & patches

Simplified IT management & operations

Standardized products facilitate advanced knowledge & expertise

Security Benefits

Enhanced protections help safeguard the network from phishing, malware, ransomware and other malicious activity.

Centrally managed single sign-on across devices

Comprehensive intelligent protection against today's advanced attacks

Data classification based on sensitivity & persistent data protection

Visibility & control over shared data to reduce the risk of a data breach
